WORK EXPERIENCE

Upwork, Alexandria VA

Freelance Software Developer

06/2020-Present

Key Skills: Angular.js | node.js | HTML/CSS | Google Cloud | Data Visualization | REST | Python | MySQL

Developed new data visualizations for a rehabilitation healthcare application.

- Reconfigured third party integrations like Zapier and Formsite
- Deployed changes on Google App Engine
- Extended API for new functionality

Bizowie Cloud ERP, Pittsburgh PA

Software Developer

02/2020-06/2020

Key Skills: Perl | JavaScript | jQuery | HTML/CSS | MySQL

Developed new software features and maintained functionality of a complex ERP software product written in Perl.

- Implemented B2B software integration to provide data utility for our clients.
- Interacted with customers to resolve problems and perform implementation tasks.
- Collaborate closely with a small group of developers to map out development goals that would improve the product.
- Optimize the SDLC through change management and strict issue tracking.

Bank of New York Mellon, Pittsburgh PA

Software Developer

01/2018-02/2020

Key Skills: Angular | Spring Boot | Java | JavaScript | HTML/CSS | Docker | REST | Python | PL/SQL | Oracle

Led development to stabilize and remediate a legacy trading application responsible for managing \$1,000,000+ cash transactions a week.

- Rewrote front-end using Angular 7 and developed a secure REST API using Java Spring Boot, deployed it on the bank's Cloud Platform.
- Patched major issues within the legacy system that introduced significant financial risks to bank's clients.
- Worked with various teams within the business to gather requirements for new features and implemented various process improvements to support the bank's clients.

EDUCATION

Bachelors of Science in Computer Science, December 2017 - University of Pittsburgh, Pittsburgh PA
